Truth, beauty, and data

Session 1

PMAP 8921: Data Visualization with R
Andrew Young School of Policy Studies
Fall 2023

Plan for today

Facts, truth, and beauty

Data, truth, and beauty

Beautiful visualizations

Class details

Facts, truth, and beauty

What is truth?

Core principles of the universe?

Underlying trends in society?

Something transcendental?

Reality?

How do we find truth?

Science!

Neil deGrasse Tyson 
@neiltyson

The good thing about Science is that it's true whether or not you believe in it.

But wait!

Beware of scientism!

"... promotion of science as the best or only objective means by which society should determine normative and epistemological values"

Science is not the only way

Art

Music

Literature

Religion

Nature

Nothing here is factual...

...but it all reveals truth

Cosette

King Lear

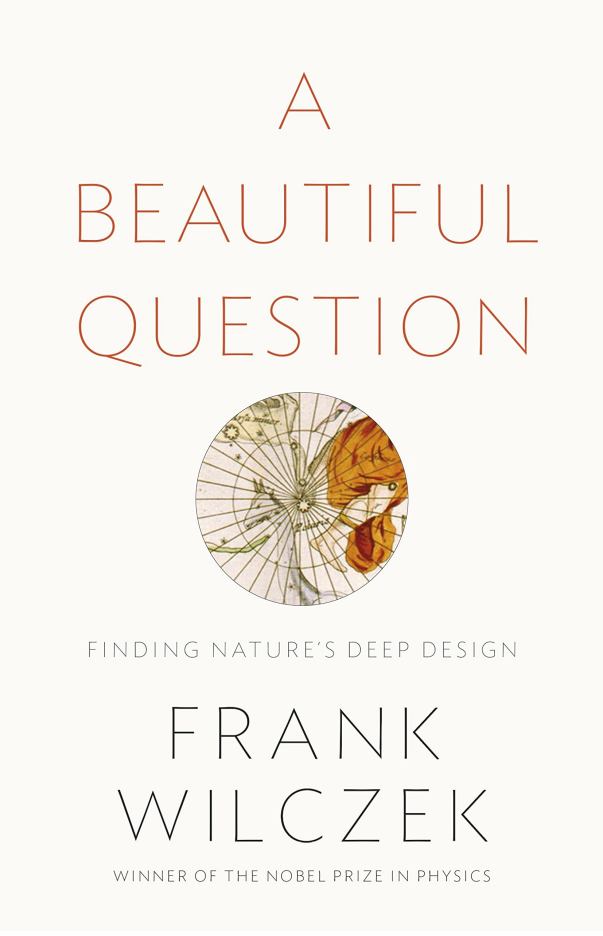
Beethoven's 9th symphony

Facts ≠ truth

Where does truth come when there are no facts?

Beauty

Beauty in science



This is also true for science and math and other more factual realms

Rhetoric and beauty

λόγος • λέξις

Logos • Lexis

Res • Verba

Essence • Structure

Content • Form

Truth • Beauty

Content + form

Art is how we translate core, essential content (or truth!) to different forms for specific audiences.

Truth is beautiful

Truth ≠ facts

Truth comes from aesthetic combination of content and form

Facts require beauty to be true

Data, truth, and beauty

Just show me the data!

```
head(my_data, 10)
```

```
## # A tibble: 10 × 2
##        x     y
##    <dbl> <dbl>
##  1  55.4  97.2
##  2  51.5  96.0
##  3  46.2  94.5
##  4  42.8  91.4
##  5  40.8  88.3
##  6  38.7  84.9
##  7  35.6  79.9
##  8  33.1  77.6
##  9  29.0  74.5
## 10  26.2  71.4
```

```
mean(my_data$x)
```

```
## [1] 54.26327
```

Seems reasonable

```
mean(my_data$y)
```

```
## [1] 47.83225
```

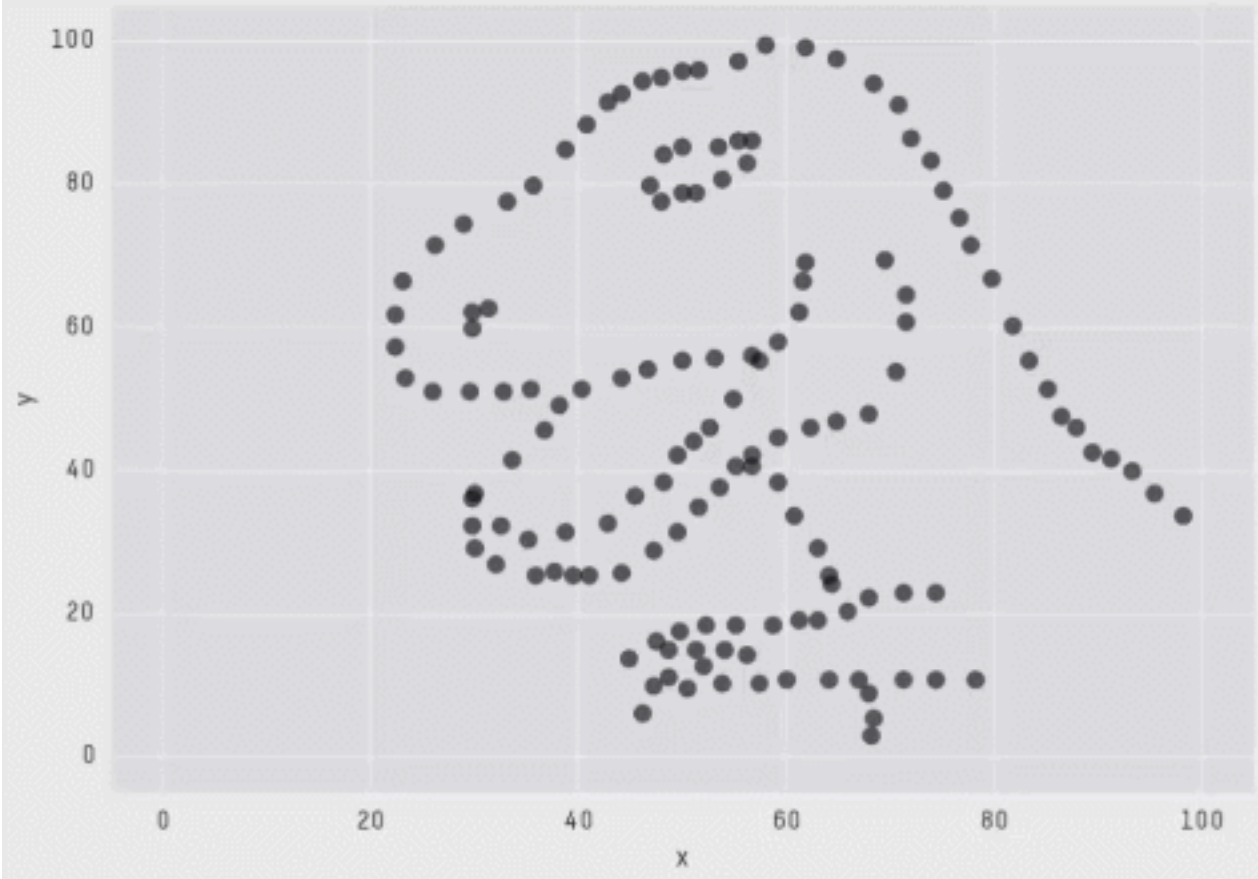
Seems reasonable

```
cor(my_data$x, my_data$y)
```

```
## [1] -0.06447185
```

No correlation

oh no

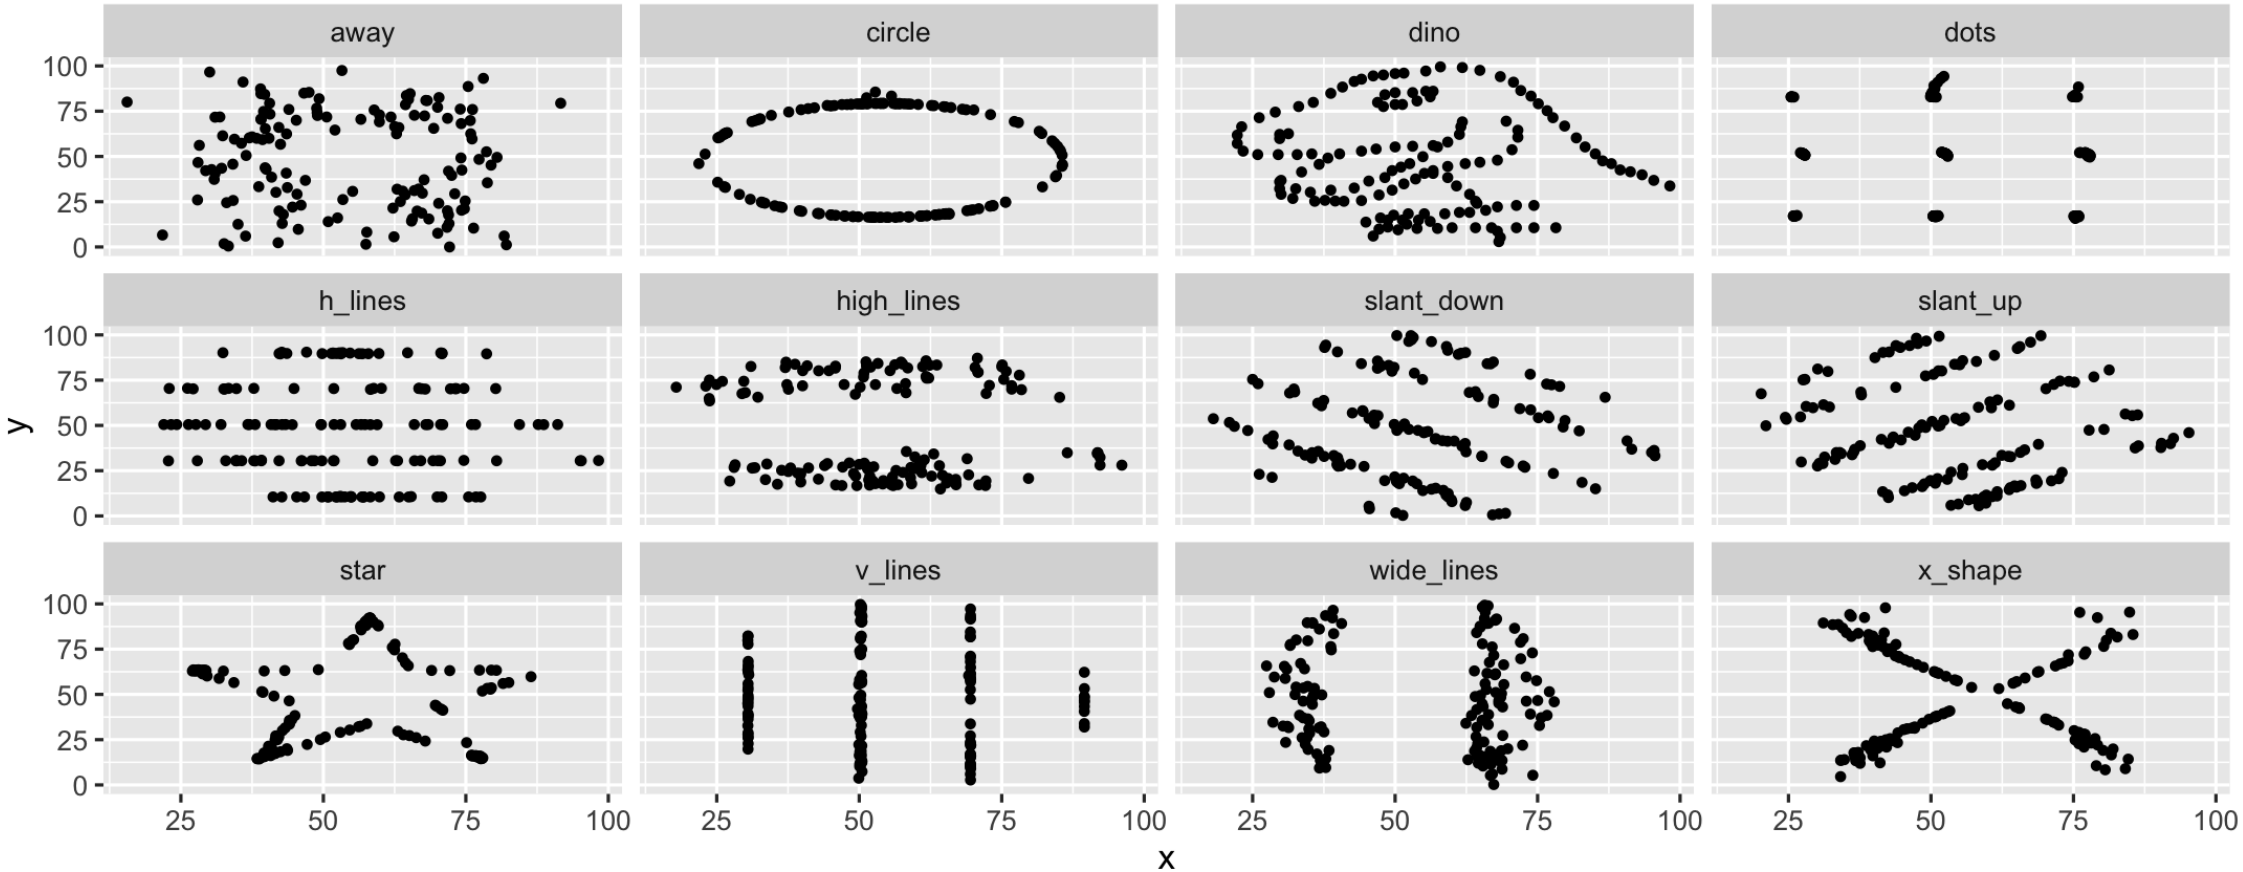


X Mean: 54.2659224
Y Mean: 47.8313999
X SD : 16.7649829
Y SD : 26.9342120
Corr. : -0.0642526

The Datasaurus Dozen

Raw data is not enough

Each of these has the same mean, standard deviation, variance, and correlation



Humans love patterns

frontiers in NEUROSCIENCE

REVIEW ARTICLE
published: 22 August 2014
doi: 10.3389/fnins.2014.00265

Superior pattern processing is the essence of the evolved human brain

Mark P. Mattson [1,2]*

[1] *Laboratory of Neurosciences, National Institute on Aging Intramural Research Program, Baltimore, MD, USA*
[2] *Department of Neuroscience, Johns Hopkins University School of Medicine, Baltimore, MD, USA*

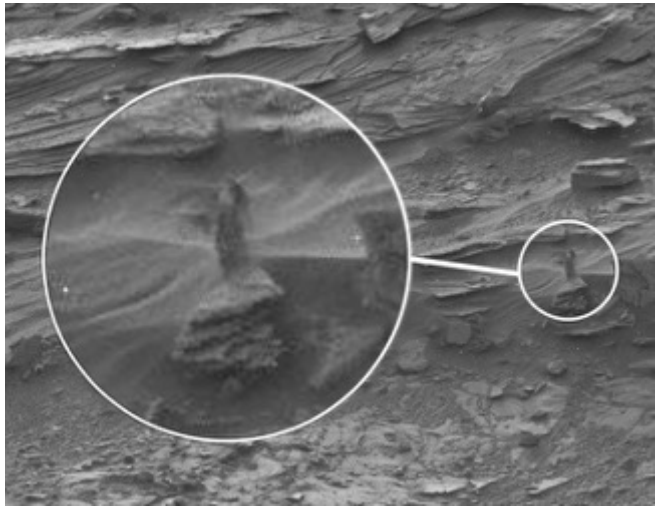
Edited by:
J. Michael Williams, Drexel University, USA

Humans have long pondered the nature of their mind/brain and, particularly why its capacities for reasoning, communication and abstract thought are far superior to other species, including closely related anthropoids. This article considers superior pattern

https://doi.org/10.3389/fnins.2014.00265

(Sometimes we love them too much)

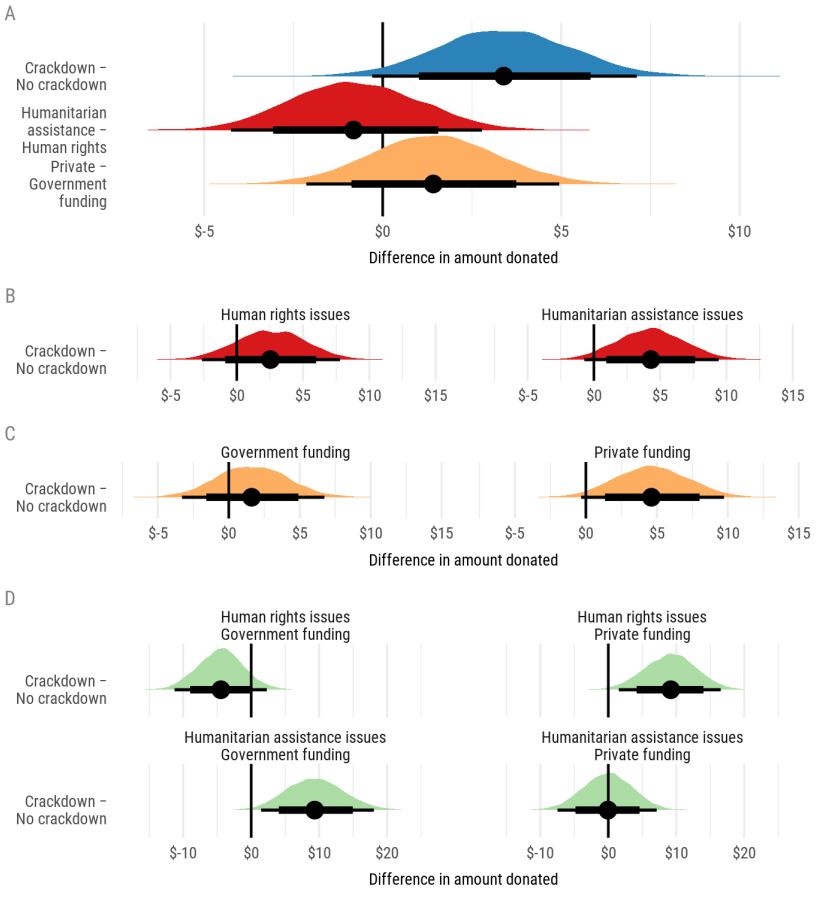
Pareidolia: seeing patterns that aren't there.



Beauty is necessary to see patterns

Table 2: Mean values and differences in means for amount donated in "crackdown" (treatment) and "no crackdown" (control) conditions; values represent posterior medians

H_{1b}	$Amount_{Treatment}$	$Amount_{Control}$	Δ	$\%\Delta$	$p(\Delta \neq 0)$
Crackdown – No crackdown	16.34	12.93	3.39	26.3%	0.97
Humanitarian assistance – Human rights	14.06	14.85	-0.82	-5.5%	0.67
Private – Government funding	15.13	13.71	1.42	10.4%	0.79
H_{2b} and H_{3b}	$Amount_{Crackdown}$	$Amount_{No\ crackdown}$	Δ	$\%\Delta$	$p(\Delta \neq 0)$
Human rights issues	17.4	14.86	2.54	17.2%	0.83
Humanitarian assistance issues	15.91	11.68	4.3	36.9%	0.95
Government funding	13.83	12.24	1.61	13.1%	0.74
Private funding	18.95	14.23	4.62	32.4%	0.97
H_{2b} and H_{3b} (nested)	$Amount_{Crackdown}$	$Amount_{No\ crackdown}$	Δ	$\%\Delta$	$p(\Delta \neq 0)$
Human rights issues, Government funding	10.56	15.15	-4.46	-29.5%	0.91
Human rights issues, Private funding	23.76	14.5	9.19	63.8%	0.99
Humanitarian assistance issues, Government funding	21.42	11.89	9.35	77.9%	0.99
Humanitarian assistance issues, Private funding	15.69	15.72	-0.05	-0.3%	0.51



Point shows posterior median; thick black lines show 80% credible interval; thin black lines show 95% credible interval

Beautiful visualizations

What makes a great visualization?

Truthful

Functional

Beautiful

Insightful

Enlightening

Alberto Cairo, *The Truthful Art*

What makes a great visualization?

"Graphical excellence is the **well-designed presentation of interesting data**—a matter of substance, of statistics, and of design ... [It] consists of complex ideas communicated with clarity, precision, and efficiency. ... [It] is that which **gives to the viewer the greatest number of ideas in the shortest time with the least ink in the smallest space** ... [It] is nearly always multivariate ... And graphical excellence requires **telling the truth about the data**."

Edward Tufte, *The Visual Display of Quantitative Information*, p. 51

What makes a great visualization?

Good aesthetics

No substantive issues

No perceptual issues

Honesty + good judgment

Kieran Healy, *Data Visualization: A Practical Introduction*
